

# KODAK Extra Bright Lamp Module

The KODAK Extra Bright Lamp Module provides the brightest light output in KODAK EKTAGRAPHIC III and EKTALITE Slide Projectors. Your images will look brighter and richer than older units without this improved module.

It features a lighted indicator on the module door. This indicator displays a "lamp ON" condition at the back of the projector. It will also help to locate the Extra Bright Lamp Module when multiple projectors are installed.

Product Selection Guide			
KODAK Extra Bright Lamp Module	EKTAGRAPHIC III (older gray and black models)	EKTAGRAPHIC III New Look (beige models)	EKTALITE (all models)

Performance Guide			
Lamp	Average Brightness (Screen Lumens)*	Average Lamp Life (Hours)†	Average % Increased Brightness with Extra Bright Lamp Module‡
EXR	1,000	40	40%
FHS	800	80	35%

\*.Using a 100 mm lens at f/2.8 on HIGH brightness setting. The LOW setting reduces brightness approximately 30%.

†.Figures represent HIGH position on projectors with HIGH and LOW settings.

‡.Based on performance tests with a single lamp. The difference between minimum and maximum brightness may be as high as 40%.

## To replace old style lamp modules:

The projector must be unplugged and cool before removing the old lamp module. Push the lamp module release button and remove the old lamp module. Insert the new Extra Bright Lamp Module in the projector and push to seat it.
